

Service Management Applications

**COMPREHENSIVE MOBILE SERVICE MANAGEMENT APPLICATIONS
ON A FUTURE-PROOF CLOUD PLATFORM**

“Acumatica is flexible and allows you to do business the way you do . . . We continue to improve our utilization of Acumatica and derive efficiency through business process audit and finance process review within a program of continuous improvement.”

Sean Reuben, CFO, Incubeta
Industry: Marketing and Advertising Services

Complete Service Management ERP

Drive growth with a comprehensive service management ERP application designed for construction, field service, professional service, and managed service providers (MSP). Acumatica includes financials, projects, customer relationship management, construction jobs, field service, purchasing, sales, and inventory applications.

Field service and construction organizations can schedule appointments, manage equipment, and track warranties and contracts. Native mobile apps empower remote workers with GPS navigation, voice-dictation for notes, and image capture via mobile devices. View equipment details and service history in

the field. Start service orders, capture electronic signatures, issue inventory items, capture expense receipts, and complete orders from any device.

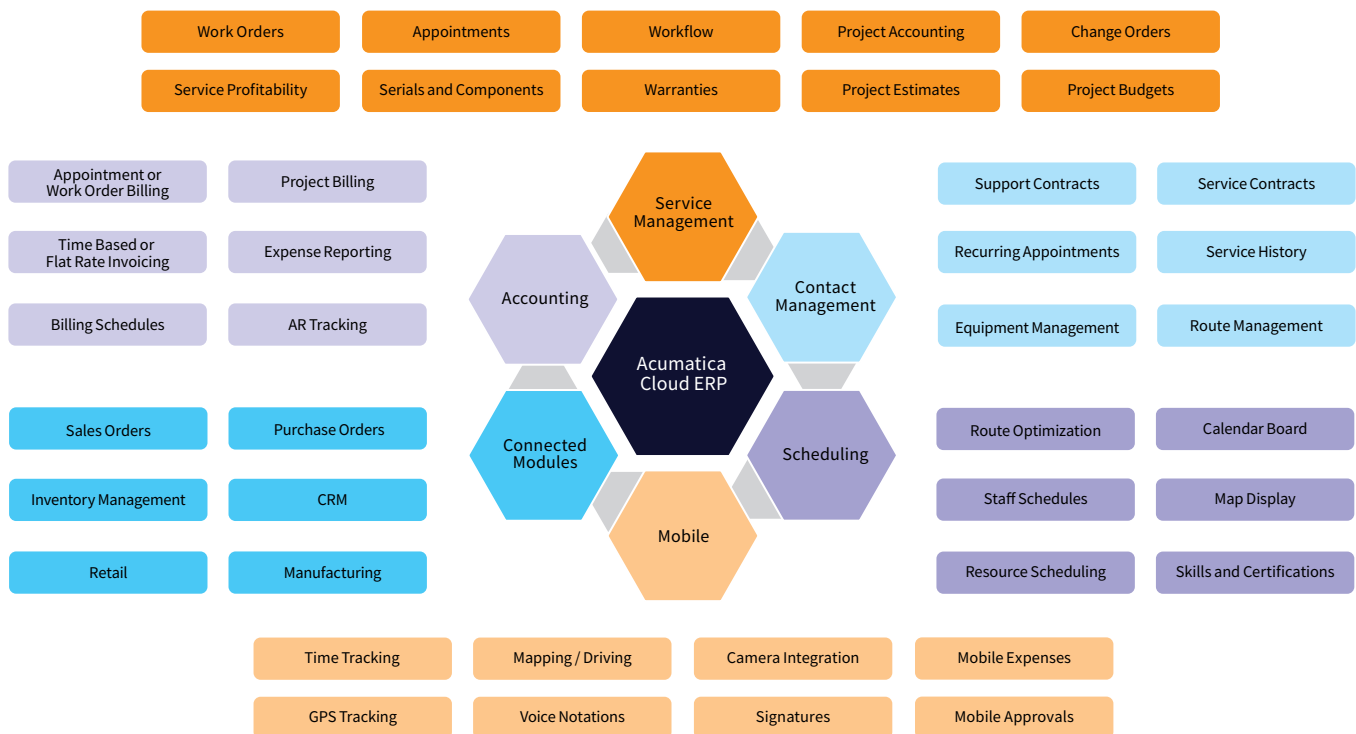

MSPs can log support cases, manage support contracts, and measure service level agreements with an online customer portal for self-service.

Professional service organizations can create and manage project estimates and budgets with configurable project billing. Create and assign project tasks, compare estimates to actual costs, and automate time and expense entry.

“We’ve torn down the silos we had with the client-server solution, so now we have access in one view of the data. We’re now able to see where we are cost-wise with our existing construction projects; we’re able to look at the profitability of each project, look at the customer base and understand where we are most successful.”

Jeff Hamilton, President, Roberts Glass & Service
 Industry: Specialty Trade Contractor

Deep Industry Functionality

Service companies have varied needs often unmet by traditional ERP applications. Acumatica provides a broad set of adaptable business applications enabling service companies to configure the application to meet their specific business and industry needs. Construction service companies enjoy robust project accounting for job management with native field service for appointment scheduling and mobile applications for technicians. Professional service organizations leverage project accounting with task entry and flexible billing. Field service companies across diverse industry segments manage equipment with serial numbers, warranties, and equipment details. The Service and Support application is essential for managed service providers with case management and customer self-service portals.

-  **Agricultural, Landscaping, and Forestry**
agricultural services, irrigation, landscaping, forestry services
-  **Commercial Services**
food and restaurant equipment and services, other commercial services
-  **Construction, Plumbing, Electrical, and HVAC**
fasteners, hardware, plumbing, heating, cooling, valve fittings

electrical, water, solar, energy, telecommunications, and other services
-  **Veterinary Services**
equine, cattle, and farm animal health services
-  **Wholesale Distribution**
product, equipment and supply deliveries, installation and repair

Access the entire Acumatica application anytime, anywhere, from a browser or mobile device. Monitor key performance indicators, capture expenses, and manage time entries and exceptions to avoid missing parts, service delays, and other issues.

Device-Agnostic Mobility

Mobility is critical for service organizations. Connect remote workers and back-office managers in real-time with appointment updates, schedule changes, technician and consultant location via the mobile app, equipment and project information, and appointment status. Remote workers can review documents and access checklists from any device with an internet connection. On-the-go executives have real-time data in the palm of their hand, including mobile dashboards, employee approval requests, time cards, and expense receipts.

Extend Acumatica with Certified Applications

The Acumatica Marketplace is one of the leading communities of independent software vendors with integrated applications for budgeting and planning, electronic data interchange (EDI), equipment rental, quality control, logistics and shipping, container management, process manufacturing, and more.

My dispatchers are thrilled to pieces to have the calendar board, the flexibility to move appointments around as they see fit, the flexibility to assign different technicians to those appointments. Also, it affords us the ability to see who's out there, who's working, and how long they're expected to be on that appointment so we can be more efficient with our estimates to our clients about when we expect to have a technician on site . . . Open tickets—they can see if somebody has been assigned to it. They can see what the progress is on that ticket. Is the technician on their way? Have they arrived?"

Jennifer Harler, COO, DP Air Corp.

Discover Why Service Companies Rely on Acumatica for their Success

LAUNCH THE VIEWER

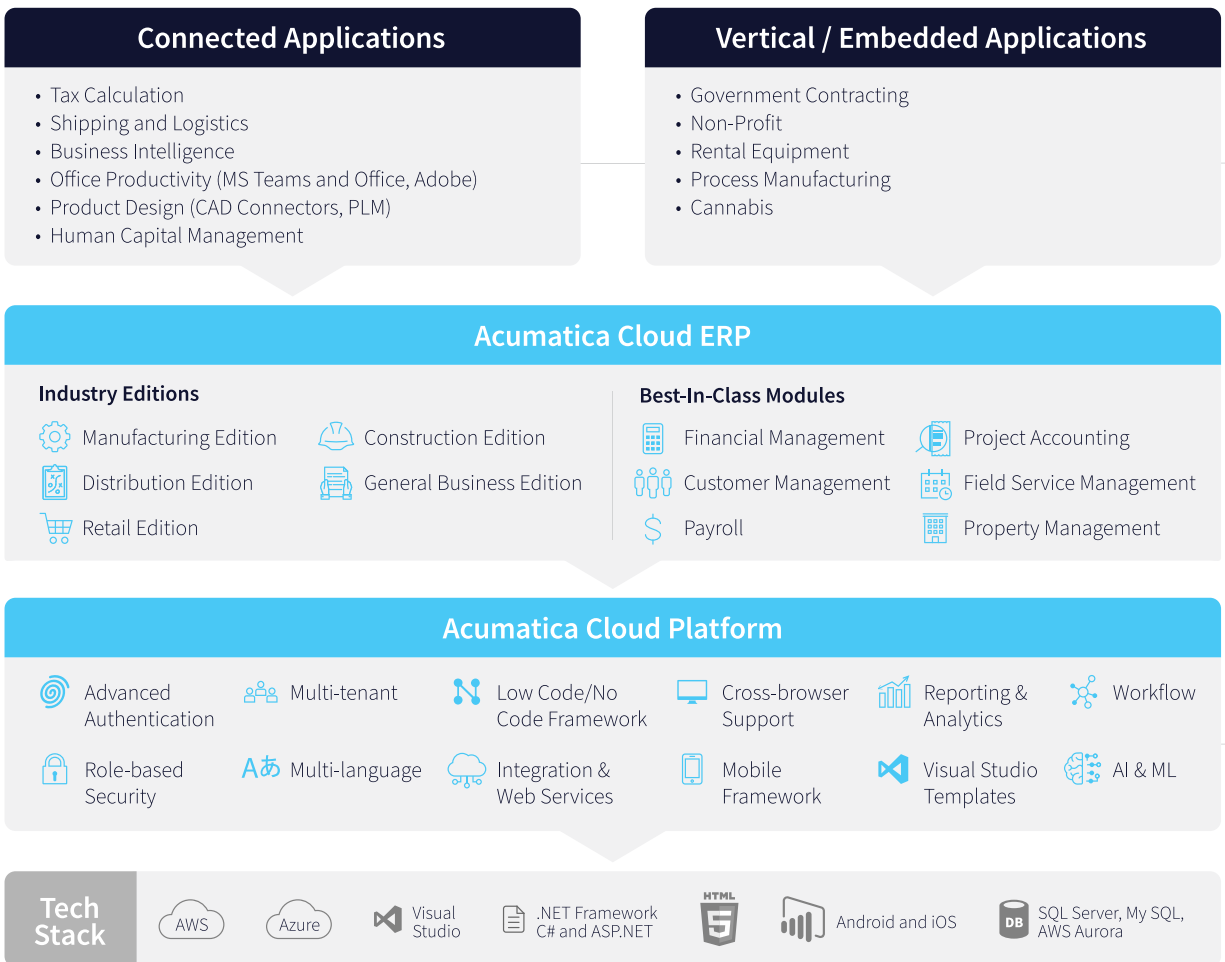

Future-proof Cloud Platform Ready for Modern Technologies

Service companies demand a modern platform built for speed and extensibility to connect external systems and data.

The Acumatica xRP platform is a versatile architectural framework and application development platform that empowers service companies to tailor the software to the way they do business. Because Acumatica's ERP platform technology uses standard web technologies

and development languages, you can modify your business logic using the platform tools or a different integrated development environment.

The platform is built on the world's best cloud and mobile technology. Leverage Open APIs to connect to the Internet of Things (IoT), capture data in real-time through machine interfaces, or automate your warehouse with robotics, carousels, and other modern technologies.

The Acumatica xRP platform is more than just technology. It is the foundation service companies demand for the future. Visual workflows, embedded document management, multilingual translations and localization, mobile expense receipts, time management, and other platform-native features are included in the most resilient cloud ERP platform available for midmarket service organizations. Acumatica Mobile Framework provides real-time access to data, and configurability without coding. It connects with mobile device features such as cameras for photos, microphones for voice notes, fingerprint recognition for security, and GPS for location tracking.

The Trusted Leader in Usability and Value

Acumatica's [Customer Bill of Rights](#) protects customers with an easy to understand End User License Agreement. It guarantees ERP implementations without hidden fees. The Bill of Rights outlines Acumatica's commitment to consumption-based licensing that does not inhibit growth. It provides sustainable pricing models with limited price increases, deployment choice, and consistent customer service access. Further, it protects customers' access to their data, anytime – even if they leave the Acumatica family.

Further, Acumatica is consistently [rated high](#) in both usability and value by industry analysts and users. Acumatica is ranked as a leader in the IDC MarketScape: Worldwide SaaS and Cloud-Enabled Midmarket Business ERP Applications. Advisory services provider Nucleus Research selected Acumatica as a market usability leader in their ERP Technology Value Matrix. The G2 user review site selected Acumatica as a Leader in the G2 Mid-Market Grid Report for ERP Systems. Acumatica maintains a near-perfect Overall User Rating on the Gartner Peer Insights report.
